Ms. Toma
HR Director
Inovio
247 Lane - 3,
Kustiya, Bangladesh.

I have done some research about your company and recently found that your company has completed several MERN projects. And some more MERN projects are ongoing and planned to start some more projects in the future with the same technology. As a recent diploma with a diploma in engineering in Computer Science from the Institute of Business and Technology, I am eager to begin my career in the tech industry by joining a dynamic and innovative team such as yours.

My education, passion for programming, and strong foundation in both front-end and back-end development make me an ideal candidate for this role. During my time at the Institute of Business and Technology, I gained hands-on experience developing web applications using **HTML, CSS, JavaScript, Node.js,** and **MongoDB** as well as working with frameworks like **Tailwind, Bootstrap, React**, and **Express.js**. Also, I have completed a **six-month full-stack web development** course.

I also completed multiple projects, including one where I created a responsive web application for a local non-profit organization. This project not only allowed me to hone my coding skills but also taught me the importance of effective collaboration and communication within a team.

Moreover, I have taken the initiative to further my skills through online courses, personal projects, and internships. My ability to adapt quickly and learn new technologies will enable me to make a positive impact on your projects. I am confident that my skills, enthusiasm, and dedication to creating and maintaining high-quality applications make me a perfect fit for the Full Stack Developer position at your company.

Thank you for taking the time to review my qualifications. I hope to have the opportunity to discuss my examples in greater detail with you. Feel free to contact me at **+880 1811115794** or **mgrakibbd@gmail.com** to schedule a meeting.

Sincerely

Md. Golam Rakib
